Technology-enabled problem solver with experience delivering AI-driven process improvements for client organizations.

Education

Bachelor of Commerce Finance Specialist & Economics Major

Completed: June, 2025

University of Toronto

Awards: Directors' Circle, Global Internal Citizen, Work-Study, PDLC

Highlighted Courses (4.0 GPA):

- Financial Modeling & Data Analytics - Applied data analytics and financial trading concepts to analyze financial markets and institutions.
- Mergers & Acquisitions – Valuation, deal structuring, synergies, LBOs, and buy-side/sell-side processes through real-world cases.
- Coding & Data Management for Business Analytics - Built Python-based data analysis skills and applied statistical methods in a large-scale analytics project.
- Business Technology Management - Evaluated technology's impact on business and developed business cases for new technology implementations.

Associations: President - Innovative Business Association, Capital Management, Middle Eastern Students' Association (MESA)

Experience

AI Automation & Solutions Consultant (Project-Based)

June 2025 – January 2026

First Marble and Granite

Doha, Qatar

- Designed and delivered AI-powered automation solutions for a mid-sized construction and materials firm, working directly with senior stakeholders to modernize operational workflows.
- Built and deployed an AI chatbot for the company website to handle client inquiries, service questions, and lead qualification, improving response speed and consistency.
- Architected an AI-enabled quotation intake and processing workflow, automating email parsing, data extraction, and structured quote preparation to reduce manual effort and turnaround time.
- Implemented an AI-assisted accounting workflow to automate receipt handling, categorization, and documentation, improving record accuracy and audit readiness.
- Established governance practices including prompt standardization, logging, access controls, and human-in-the-loop validation for business-critical automation.
- Prepared and delivered executive presentations and documentation outlining AI architecture, business impact, limitations, and next-phase recommendations to support leadership decision-making.

Finance Analyst

January 2023 – June 2025

Li Koon Chun Financial Center

Mississauga, ON

- Undertook large-scale data cleaning projects using Python to ensure accuracy and reliability of financial datasets, enabling in-depth statistical analysis that derived meaningful insights and trends.
- Advised, guided and supported 1000+ users and faculty for 20+ financial software applications, including Bloomberg.
- Maintained an extensive knowledge base of financial and statistical software features, updates, and troubleshooting.
- Developed guides for financial software such as Bloomberg, FactSet and Stata, simplifying complex functionalities.

Professional Development & Learning Centre Assistant

October 2023 – June 2025

University of Toronto Department of Management

Mississauga, ON

- Organized and led 10+ employer engagement workshops in collaboration with Deloitte, EY, and KPMG, personally bringing in industry professionals to share insights on career paths, recruitment expectations, and resume practices.
- Developed and maintained professional communications and operational materials to support program delivery, employer coordination, and participant engagement.
